Dear Department of Justice:

I request that the DOJ settle the Microsoft lawsuit as it is now proposed. Contrary to what others may say, Microsoft has done wonders for my ability, and many others, to create and maintain a small business. Without their quality, integrated software I would not be able to manage my business, and it also would have created problems in most other businesses. Microsoft products are excellent and that company should not be criticized for doing a good job at innovating effective software that benefits most of the world. Please settle this case as soon as possible.
